## SUMMARY

Computer science undergraduate looking for an opportunity to work as a developer in an organization that implements my advanced knowledge and skills to contribute to the organization's success.

## EXPERIENCE

### 1) Cognizant Technological Solutions - Intern

**Programme Analyst Trainee (PEGA Developer)**          **Feb-2023 to July-2023**

- Implemented Pega applications using Pega BPM and CRM software to streamline business processes, enhance operational efficiency, and improve client project outcomes.
- Acquired expertise in Pega workflows and rules, effectively translating client requirements into optimized solutions within Pega applications.
- Contributed to successful project delivery by collaborating with cross-functional teams, providing technical expertise, and ensuring adherence to project timelines.

### 2) Lattech Elegocart Pvt.Ltd - Intern

**Associate Software Developer (web/iOS Developer).**          **May-2022 to Aug-2022**

- Completed an internship working on a hospital management project, taking on multiple responsibilities including UI/UX design using Figma, and database connection utilizing Firebase and SQL.
- Developed applications using Dart in a Flutter environment, showcasing proficiency in cross-platform mobile app development.

## EDUCATION

**BACHELOR OF ENGINEERING (BE)**                                        **2020 - 2023**
Computer Science And Engineering                                        **Dharwad**
SDM College of Engineering and Technology

**DIPLOMA**                                                                          **2016 - 2020**
Computer Science And Engineering                                        **Bagalkot**
BVVS Polytechnic (Autonomous), Bagalkot| 2016 - 2020

## SKILLS

### PROGRAMMING LANGUAGES

- MERN FullStack
- Java, JavaScript
- C Programming
- Shell Commands

### TECHNOLOGIES

- SQL
- HTML, CSS
- Node Js
- AWS Services
- GitHub

### FRAMEWORKS

- ReactJS
- Flutter
- PEGA (BPM)

## PROJECTS

**RAPIDUS - Dynamic Infrastructure Framework Using Serverless Functions (AWS Cloud- Lambda Function)**
**TechStack used:** Python, AWS Lambda Functions, EC-2, S3-Bucket, Shell, and Linux OS.

- Developed and implemented Rapidus, a framework for building and deploying repeatable infrastructure.
- Designed to optimize time-consuming workflows by transitioning them to the cloud.
- Demonstrated expertise in cloud computing, infrastructure design, and task optimization.
- Contributed to increased efficiency and reduced processing time by leveraging the Rapidus framework.
- Applied best practices in infrastructure automation, improving scalability and productivity.

**DOC-PRINT (Website For Xerox Shop keeper)**
**TechStack used:** JavaScript, HTML, CSS, Node Js, ReactJS, SQL, and Java OOP'S.

- Developed a user-friendly website for Xerox shopkeepers, enabling seamless document submission and printing through separate user and shopkeeper domains.
- Streamlined the process by allowing users to scan a QR code and upload documents directly, eliminating the need for contact information exchange and simplifying the submission process.
- Ensured user privacy by implementing security measures to protect personal details and prevent unwanted access.
- Demonstrated expertise in web development, database management, and optimizing user experience, contributing to enhanced operational efficiency and customer satisfaction in the Xerox shopkeeper environment.

**Skill Labor Management System (Android And IOS Application)**
**TechStack used:** Flutter, Dart, Firebase, and Java OOP'S.

- Developed and deployed an innovative Flutter-based application for Android and IOS platforms, streamlining the connection between skilled workers and client needs. Implemented user-friendly interfaces and intuitive features for the seamless matching of skilled workers to client projects.
- Demonstrated proficiency in mobile app development using Flutter, showcasing strong problem-solving skills in addressing the challenge of connecting skilled workers with client requirements.

## CERTIFICATIONS

- **Pega System Architect Certified**

Pega Academy

- **CCNA 1 (Cisco Certified Network Associate)**

Cisco Academy

- **Java Certification Of Course**

SkillUP

- **The Java Programming A-Z Definitive Diploma**

Udemy

- **Digital Marketing**
